GROWING REVENUE

With 95% of the world’s consumers located outside the United States, Illinois companies can grow their business by exporting their U.S.A.-made goods and services around the globe. Record-setting U.S. export levels underscore the vast opportunity. In 2023, U.S. exports of goods and services increased 1.1%, to \$3.05 trillion¹, according to the U.S. Census Bureau and the Bureau of Economic Analysis, at the U.S. Department of Commerce. You can be part of this revenue stream with EXIM’s assistance.

WHAT'S STOPPING YOU FROM EXPORTING?

Imagine this: your U.S. business has identified an international buyer for its product, you have agreed on pricing, and your buyer wants open account credit terms. How will your company manage the risk of nonpayment by your international buyer? Insuring the receivables generated by international sales with EXIM's Export Credit Insurance is a great place to start.

Export Credit Insurance is an insurance policy that covers international receivables.

Export Credit Insurance mitigates the risk of nonpayment and empowers you to meet, or beat, your competitors by offering attractive credit terms. Your business can use open account credit terms to win new customers and increase sales to existing buyers.

Another benefit to insuring international receivables is that lenders will often accept them as collateral, expanding your borrowing base and improving cash flow.

Export Credit Insurance:

- ✔ Increases your ability to compete in international markets
- ✔ Protects your international invoices from nonpayment
- ✔ Expands your borrowing base for improved liquidity

BENEFITS INCLUDE:

Increased Sales

Every business wants to be more competitive. Providing open account credit terms can be the difference between winning and losing a deal. With more time to pay, customers have the financial flexibility to increase the size of their orders. Open account credit terms speeds up the delivery of goods by avoiding delays associated with a letter of credit or cash in advance.

Risk Prevention

The challenge for exporters, particularly small businesses, is clear. Selling to international buyers on open account credit terms can be risky. If the buyers don't pay, there is little recourse for a U.S.-based company and the financial impact can be significant. Export Credit Insurance mitigates the risk of nonpayment by insuring international receivables.

Cash Management

When your business needs cash to fulfill orders or pay for operations you often look to your local lender. These lenders are more likely to include international receivables in your borrowing base when those receivables are insured, giving you access to additional financing and improving cash flow.

“All our sales are international. EXIM helped double and triple our export sales throughout the years. We certainly would not be here today if it were not for EXIM support throughout the years. EXIM helped provide a level playing field for us in the global marketplace. Many countries have robust policies supporting their exporters, and without EXIM's support mitigating the financial risks for us, we'd be in a very disadvantageous position.”
